

Asthma Inhalers

Act 187 requires school districts to adopt written policies to allow children of school age to possess and self-administer an asthma inhaler in a school setting. In response to Act 187, the Warwick School District has developed a form which must be completed for students who need to carry their inhalers in school. Because the law is so specific, the Warwick School District form is the only form that will be accepted to allow a student to carry an inhaler while in school. A copy of this form is attached for your use.

Please contact a school nurse if you have any questions.
